FOR IMMEDIATE RELEASE

Roofing Association continues to educate its members.

On April 16, 2004 the Colorado Roofing Association's Education Committee welcomed member contractors and consultants to a breakfast seminar on the proper application and use of silicone caulking. Prime Industries, a local distributor of industrial sealants, hosted the event. Gene Dorman with GE Silicones brought his 25 years experience to Denver to discuss proper surface preparation, substrate compatibility, and application techniques. The seminar was concluded with a question and answer session, including apparel giveaways and Rockies baseball tickets.

It is the CRA's continuing goal to educate the Colorado roofing community by offering avenues from which members and non-members can gain knowledge through pinpoint seminars, forums, etc. For more information about the Colorado Roofing Association, call 303-892-6966, ext. 2 or log-on to www.coloradoroofing.org.
